

Enterprise deployment roadmap

How SpecSense hosts your data today, where it moves at enterprise scale, and every vendor in between. Answers the procurement questions before you have to ask them.

CURRENT STATE — PILOT INFRASTRUCTURE

What runs today. All pilots covered by NDA + DPA; scope limited to redacted documents.

Layer	Vendor	Region	Attestations
Marketing site	Vercel	Global edge · EU functions available	SOC 2 Type II · ISO 27001 · GDPR
Pilot portal (compute)	Railway	US-East (current)	SOC 2 Type II
Pilot portal (database)	Embedded SQLite on Railway volume	Co-located with compute	Pilot-scale only · migrating to Supabase EU
Document storage	Railway persistent volume	Co-located with compute	Encrypted at rest · migrating to Supabase Storage EU
AI inference	Anthropic (Claude)	US · EU via Bedrock on roadmap	SOC 2 Type II · zero training on inputs (contractual)
Payments	Stripe	Ireland (EU customers)	PCI DSS Level 1 · SOC 2 Type II
Email (transactional)	Resend	US / EU	SOC 2 Type II
DNS + TLS	Cloudflare	Global	SOC 2 Type II · ISO 27001

ENTERPRISE TARGET — WHERE YOUR DATA MOVES

Committed roadmap. Delivery is triggered by first Team/Enterprise contract or specific customer residency requirement, whichever comes first.

Layer	Vendor	Region	Delivery
Marketing site	Vercel (unchanged)	Global edge · EU functions	Now
Portal database	Supabase Postgres	Frankfurt (eu-central-1)	Q4 2026 · triggered by first paid contract
Document storage	Supabase Storage	Frankfurt (eu-central-1)	Q4 2026 · alongside DB migration
Portal compute	Fly.io	Frankfurt (fra) + London (lhr)	Q1 2027 · removes last US-region dependency
AI inference	Anthropic via AWS Bedrock	eu-central-1 (Frankfurt)	Q1 2027 · on enterprise-tier customer request
Per-tenant encryption keys	Supabase KMS	eu-central-1	Q4 2026 · Enterprise tier only
Row-level security (RLS)	Postgres native	eu-central-1	Q4 2026 · enforced per company_id tenant

COMPLIANCE ROADMAP

Q4 2026	Information-security policy set adopted (board-signed)
Q4 2026	Supabase EU migration — Postgres + Storage + RLS
Q1 2027	Fly.io Frankfurt + London compute deployment
Q1 2027	SOC 2 Type I audit — targeted
Q3 2027	SOC 2 Type II audit — targeted (the badge enterprise procurement accepts)
Q4 2027	ISO 27001 — targeted (demand-dependent)

PROCUREMENT — SIX ANSWERS ON THE RECORD

Train on our data? No. Contractual with Anthropic and with you via DPA. Never fine-tune, prompt-tune, or retrain.	Where does data live today? Vercel edge (marketing) + Railway US-East (portal). Pilots under NDA + DPA on redacted docs.
Where will it live at enterprise? Supabase Postgres Frankfurt (Q4 2026) + Fly.io Frankfurt/London (Q1 2027). UK/EU/UAE options post-SOC 2 Type I.	IP ownership? Yours. Inputs and outputs. Minimum license needed to deliver the review. No downstream use.
Tenant isolation? Logical isolation today. Row-level security + per-tenant keys with Supabase migration (Q4 2026).	Data export & deletion? One-click export (PDF/CSV/native). Deletion within 30 days on request. Written destruction attestation.
